Brand shares in your wallet

Four guarantees. One transaction.

Signature, not pixels

Change one digit and the claim fails.

```
keccak256(  
  tag,  
  merchant,  
  receipt)
```

Counted once, for anyone

The receipt's nullifier burns on-chain.

Yours. No admin.

Admin-less ERC-4626 vault shares.

9.2x cheaper to verify

Ed25519 in Rust on Arbitrum Stylus.

The rails already exist.

Global protocol, rail-first launch. Currency is set per brand, geography is a policy adapter, budgets fund in USDG. We start where payments are already digital: Singapore and India.

24.07B

UPI payments in India in September 2026 alone. Singapore's PayNow and SGQR leave the same merchant trail. Each one is a purchase that could be sealed.

NPCI UPI product statistics

Loyalty software market, growing 10.7% a year

Grand View Research, 2026

+244%

digital document forgeries, year on year. Verified receipts become a need.

Signature verified

stockbacks.vercel.app/app/scan

Vault shares in your wallet

stockbacks.vercel.app/app/portfolio

About 30 seconds end to end. Tampered or replayed QR codes are rejected before anything is signed.

Built, deployed, measured.

9.2x
less gas than Solidity

130
tests across 9 contracts (8 Solidity, 1 Rust on Stylus) and the web app

100 USDG
funded the Nike budget on-chain, swapped to 10,000 mNKE

Everyone keeps what's theirs.

Shoppers

- ✓ A share of the brand, not a point
- ✓ No expiry, no admin can dilute it
- ✓ No personal data on-chain
- ✓ One wallet for every brand

Brands

- ✓ Pay only for signed, verified purchases
- ✓ Budgets and daily caps they set
- ✓ No coalition operator taking a 10–30% cut
- ✓ Fund rewards in USDG, in any market

Where it goes next.
